

T Level Technical Qualification in Digital Software Development (Level 3)

Specimen Assessment Material

Time 3 hours

**Paper
reference**

XXXXXX/XX

Core: Employer Set Project

**TASK 2: Identifying and fixing defects in existing code
Task Booklet**

You must have:

Task2_RBSX_NonWorkingCode.py
Task2_Test_Log_Template.docx

Information

- The total mark for this set task is 21.
- This booklet is specific to each series and this material must only be issued to students who have been entered to undertake the task in the relevant series.
- This booklet must be kept securely until the start of the timetabled assessment.

Instructions to Students

You must complete ALL parts of the activity within the assessment.

Read the assessment information carefully.

You must plan your time and submit all required evidence at the end of the supervised period.

The task must be undertaken at the time and on the date specified by Pearson

You have **three hours** in total to complete this task.

Your provider will advise you of when any supervised breaks have been scheduled.

The task must be completed under supervised conditions.

You must work independently throughout the supervised assessment period and should not share your work with other students.

During this task you are **not** permitted:

- to have access to the internet
- to use AI or any other tool designed to automate the testing and/or fixing process.

You are permitted to use **offline** versions of relevant software to produce evidence for this task.

Files provided for use during this activity:

- *Task2_Test_Log_Template.doc*
- *Task2_RBSX_NonWorkingCode.py*

Your work and any material provided must be kept securely at all times.

Set Task Brief

You are a member of the programming team that is developing a program to meet the requirements in the Set Task Information.

Your manager has asked you to look at some code that a junior software developer has produced but which is not yet functional.

The code that is not yet functioning is provided for you in the file *Task2_RBSX_NonWorkingCode.py*.

Activity

Produce and apply a test plan to:

- identify the defects that exist in the code
- apply a solution to fix the defects in the code provided
- document the process that you followed to fix the code.

When applying a solution to fix the defects you must:

- ensure the code meets the requirements in the Set Task Information
- use Python 3 (*Python 3.10 upwards*) programming language
- follow accepted programming conventions
- test your solution to ensure that it functions as expected.

Use the Set Task Information, test log template and code provided when completing this activity.

(Total for Task 2 = 21 marks)

Outcomes for Submission

Save your code as a .py file.

Save your testing document as a PDF file.

All files should be saved in your folder for submission.

Use this naming convention:

- *Task2_DSD_Code_[Registration number]_[surname]_[first letter of first name]*
- *Task2_DSD_Test_Log_[Registration number]_[surname]_[first letter of first name]*

Set Task Information

RBSX Group Ltd has provided you with this set of information to develop your program.

Requirements

The program will be part of the new system's Investments and Savings module.

You need to create a program that will allow the user to enter this information:

- client/investor details:
 - name
 - Client_ID number
- amount to be invested (per month)
- the type of investment they want.

The program should then provide the user with a personalised investment quote that shows:

- customer details
- the maximum and minimum they can expect the investment to be worth after five years:
 - total profit made
 - total fees paid.

Values should be formatted as currency (GBP) to two decimal places.

The program should be able to handle user errors.

Client_ID number

Must be 10 characters in length.

Types of investment

Investment types offered	Information
Option 1 – Savings plans	Maximum investment per year: £20 000 Predicted returns per year: • 1.2% to 2.4% RBSX Group fees per year • 0.25%
Option 2 – Managed stock investments	Maximum investment per year: unlimited Predicted returns per year: • 4% to 23% RBSX Group fees per year: • 1.3%
