

T Level Technical Qualification in Digital Software Development (Level 3)

Specimen Assessment Material

Time 4 hours

**Paper
reference**

XXXXXX/XX

Core: Employer Set Project

TASK 4a: Developing a solution

Task Booklet

You must have:

Task4a_RBSX_data.csv

Task4a_RBSX_currency_conversion.py

Information

- The total mark for this set task is 34.
- This booklet is specific to each series and this material must only be issued to students who have been entered to undertake the task in the relevant series.
- This booklet must be kept securely until the start of the timetabled assessment.

Instructions to Students

You must complete ALL parts of the activity within the assessment.

Read the assessment information carefully.

You must plan your time and submit all required evidence at the end of the supervised period.

The task must be undertaken at the time and on the date specified by Pearson.

You have **four hours** in total to complete this task.

Your provider will advise you of when any supervised breaks have been scheduled.

The task must be completed under supervised conditions.

During this task you are **not** permitted:

- to have access to the internet
- to use AI or any other tool designed to automate producing a solution.

You are provided with these files for use during this task:

- *Task4a_RBSX_data.csv*
- *Task4a_RBSX_currency_conversion.py*

Your work and any material provided must be kept securely at all times.

Set Task Brief

The design ideas for the currency conversion part of the solution that you worked on in Task 3 have been reviewed by your manager. A senior developer has coded the solution, and your manager has presented it to RBSX Group Ltd.

Since then, RBSX Group Ltd has requested some additional functionality to be added to further develop the solution.

Your manager has provided you with:

- the file *Task4a_RBSX_data.csv* which contains the data that will be used by the solution
- the file *Task4a_RBSX_currency_conversion.py* which contains the code created by the senior developer.

Activity

Develop the programming code for the data service so that it meets the updated system and user requirements provided in the Set Task Information.

During development of the solution:

- make sure that your code is maintainable, readable and functional
- follow accepted programming conventions
- follow secure coding and data-handling principles.

During this task you do **not** need to formally document your testing.

Use the Set Task Information, data file and code provided when completing this activity.

(Total for Task 4a = 34 marks)

Outcomes for Submission

Save your code as PDFs and as .txt files.

Save a working version of your solution as a .py file.

All files should be saved in your folder for submission.

Use this naming convention:

- *Task4a_DSD_Code_[Registration number]_[surname]_[first letter of first name]*

You may use any appropriate folder structure and naming convention to save the working version of the solution.

Set Task Information

RBSX Group Ltd have provided these updated system requirements:

- the existing code provided allows users to input an amount in one currency and convert this to another currency based on the most up-to-date figures provided.
- the solution must also identify trends and patterns over time for:
 - the value of the pound (GBP) compared to other currencies
 - the performance (e.g. increase/decrease in value) of a selected currency
- the solution must be secure.

RBSX Group Ltd has also provided user requirements for the solution. The solution should:

- be easy to use
- display information in a meaningful way
- make use of appropriate textual, numerical and graphical output in a way that would be relevant to the end user.

Note – the data shows the daily conversion rate between currencies for a 12-week period.
